

# DIESL'S TECHNOLOGY EDGE

SAP

DIESL provides integrated applications and world class systems to facilitate end-to-end solutions for its customer's business needs. We have already invested INR 45 crores in building our IT capabilities to benchmark it with the best internationally.

## DIESL's Technology Integration

### WIMac - DIESEL's Warehouse Management System

- > DIESEL offers Warehouse Management System with integration points available to connect to Customer's ERP to facilitate automation of transactions in their ERP.
- > WIMac can also be offered as a tool integrated with DIESEL SAP in order to cater to Trading and Consignment Business.

#### ADVANTAGE WIMac

- > Receiving, Put away
- > Cross-Docking, Order/Wave planning
- > Work & Task Management
- > Picking, Packing, Shipping
- > Report generation
- > Inventory control, cycle counting
- > Transaction Logging
- > VAS/Kitting

### Connect - DIESEL's Distribution Management System

- > Connect is offered as a Transport Management System. It streamlines the entire process in distribution right from receiving the Consignment Note to the Invoicing for vendors as well as the customers.

#### ADVANTAGE CONNECT - DOMESTIC

- > High performance transportation optimization
- > Complete logistics network visibility to its customers
- > Logistics automation with exception management
- > Track & Trace

#### ADVANTAGE CONNECT INTERNATIONAL

Connect International - DIESEL's International Logistics Solutions

- > Connect International, DIESEL's Import & Export Management System, is offered as an integrated tool with Connect & WIMac.
- > Online Quote Management
- > Sales Projection Management
- > Billing & Vendor Payment Management
- > Credit Management
- > Sales Performance Management
- > Shipment Life Cycle Visibility

## What's in it for You?

- > Deep **visibility & accountability**
- > **Relearning is avoided** for both parties' personnel
- > Objective reviews month on month with **auto generated reports**
- > Duplicity is averted with established **infrastructure & technology**
- > **Speedy Roll out** due to quick integration - no need to re-invent the wheel
- > **Licensing cost** which client would have to extend to us by using client's WMS would be saved
